DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 23-27 are drawn to a process for preparation of an agglutination reagent for rapid and early detection of typhoid.

Group II, claim(s) 28, drawn to a kit comprising a reagents, storage buffer, glass slides, droppers, wooden stick and positive and negative controls.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The groups are have different special technical feature. The process for a preparation can be used with methods or products. For instance, the kit has additional regents and components not required by group I. Specifically, the kit of group II requires storage buffer, glass slides, droppers, wooden stick and positive and negative controls. Therefore, the kit's special technical feature is comprised within the kit and not within the methods steps; therefore the groups lack the same or corresponding technical feature.

Groups I and II, is drawn to an unrelated inventions because it use, function and effect are patentably distinct in comparison to the other groups. Group I has a

different special technical feature when compared to the claim of Group II; because the recited components of the kit are the special technical features. These special technical features are comprised within their structural differences of the assembly. Accordingly, the groups lack a corresponding technical feature. Therefore, there is no corresponding special technical feature between the groups I and II.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ja-Na Hines whose telephone number is 571-272-0859. The examiner can normally be reached Monday thru Thursday.
